

§ 1466.5

7 CFR Ch. XIV (1–1–10 Edition)

(5) Promotion of at-risk species habitat conservation.

(b) In consultation with other Federal agencies, NRCS will undertake periodic reviews of the national priorities and the effects of program delivery at the State and local level to adapt the program to address emerging resource issues. NRCS will:

(1) Use the national priorities to guide the allocation of EQIP funds to the NRCS State offices,

(2) Use the national priorities in conjunction with State and local priorities to assist with prioritization and selection of EQIP applications, and

(3) Periodically review and update the national priorities utilizing input from the public and affected stakeholders to ensure that the program continues to address priority resource concerns.

§ 1466.5 National allocation and management.

The Chief allocates EQIP funds to the State Conservationists to implement EQIP at the State and local level. In order to optimize the overall environmental benefits over the program duration, the Chief will:

(a) Use an EQIP fund allocation formula that reflects national priorities and that uses available natural resource and resource concerns data to distribute funds to the State level. This procedure will be updated periodically to reflect adjustments to national priorities and information about resource concerns and program performance. The data used in the allocation formula will be updated as they become available.

(b) Provide a performance incentive to NRCS in States that demonstrate a high level of program accomplishment in implementing EQIP. The Chief shall consider factors such as strategically planning EQIP implementation, effectively addressing national priorities and measures, State and local resource concerns, the program delivery effectiveness, the use of TSPs, and the number of contracts with historically underserved producers.

(c) Establish State level EQIP performance goals based on national, regional, and State priorities.

(d) Ensure that national, State and local level information regarding program implementation such as resource priorities, eligible practices, ranking processes, payment schedules, fund allocation, and program achievements are made available to the public.

(e) Consult with other Federal agencies with the appropriate expertise and information when evaluating the considerations described in this section.

(f) Authorize the State Conservationist, with advice from the State Technical Committee and local working groups, to determine how funds will be used and how the program will be administered to achieve national priorities in each State.

(g) Utilize assessment, evaluation, and accountability procedures based on actual natural resource and environmental outcomes and results.

§ 1466.6 State allocation and management.

The State Conservationist will:

(a) Identify State priority resource concerns, with the advice of the State Technical Committee, which directly contribute toward meeting national priorities and measures, and will use NRCS's accountability system and other accountability tools to establish local level goals and treatment objectives;

(b) Identify, as appropriate and necessary, designated conservationists who are NRCS employees that are assigned the responsibility to administer EQIP in specific areas; and

(c) Use the following to determine how to manage EQIP and how to allocate funds within a State:

(1) The nature and extent of priority resource concerns at the State and local level;

(2) The availability of human resources, incentive programs, educational programs, and on-farm research programs from public, private, and Tribal sources, to assist with the activities related to the priority resource concerns;

(3) The existence of multi-county and/or multi-State collaborative efforts to address regional priority resource concerns;

(4) Program performance and results;

Commodity Credit Corporation, USDA

§ 1466.8

(5) The degree of difficulty that producers face in complying with environmental laws; and

(6) The presence of additional priority resource concerns and specialized farming operations, including but not limited to, specialty crop producers, organic producers, and small-scale farms.

§ 1466.7 Outreach activities.

NRCS will establish program outreach activities at the national, State, and local levels in order to ensure that producers whose land has environmental problems and priority resource concerns are aware and informed that they may be eligible to apply for program assistance. Special outreach will be made to eligible producers with historically low participation rates, including but not restricted to, limited resource, socially disadvantaged, small-scale, or beginning farmers or ranchers, Indian Tribes, Alaska Natives, and Pacific Islanders.

§ 1466.8 Program requirements.

(a) Program participation is voluntary. The applicant must develop an EQIP plan of operations for the agricultural or nonindustrial private forest land to be treated that serves as the basis for the EQIP contract. NRCS provides participants with technical assistance and payments to plan and apply needed conservation practices.

(b) To be eligible to participate in EQIP, an applicant must:

(1) Be in compliance with the highly erodible land and wetland conservation provisions found at part 12 of this title;

(2) Have an interest in the agricultural operation as defined in part 1400 of this chapter;

(3) Have control of the land for the term of the proposed contract period;

(i) The Chief may determine that land administered by the Bureau of Indian Affairs (BIA), Indian land, or other such circumstances provides sufficient assurance of control,

(ii) If the applicant is a tenant of the land involved in agricultural production or forestry management, the applicant shall provide the Chief with the written concurrence of the landowner in order to apply a structural conservation practice,

(4) Submit an EQIP plan of operations or plan developed for the purposes of acquiring an air or water quality permit, provided these plans contain elements equivalent to those elements required by an EQIP plan of operations and are acceptable to the State Conservationist as being consistent with the purposes of the program;

(5) Supply information, as required by NRCS, to determine eligibility for the program, including but not limited to, information to verify the applicant's status as a limited resource, beginning farmer or rancher, and payment eligibility as established by part 1400 of this chapter; and

(6) Provide a list of all members of the legal entity and embedded entities along with members' tax identification numbers and percentage interest in the entity. Where applicable, American Indians, Alaska Natives, and Pacific Islanders may use another unique identification number for each individual eligible for payment.

(c) Eligible land includes agricultural land and nonindustrial private forest land, and other land on which agricultural products, livestock, or forest-related products are produced and resource concerns may be addressed. Other agricultural lands include cropped woodland, marshes, incidental areas included in the agricultural operation, and other types of agricultural land used for production of livestock. However, land may be considered for enrollment in EQIP only if NRCS determines that the land is:

(1) Privately owned land;

(2) Publicly owned land where:

(i) The land is a working component of the participant's agricultural and forestry operation, and

(ii) The participant has control of the land for the term of the contract, and

(iii) The conservation practices to be implemented on the public land are necessary and will contribute to an improvement in the identified resource concern; or

(3) Indian land.

(d) Sixty percent of available EQIP financial assistance will be targeted to conservation practices related to livestock production, including practices
